Have asked

I was looking at the adjoining blocks on way in but they are of different design

John

Please also very importantly note we do not want to do anything beyond your temporary conditions, at this stage, as we don't want to get conflicted in any future technical enquiries.

Your email makes clear this is a temp conditions role only, anything beyond that we currently do not consider we could participate in.

I just wanted to be clear.

Many thanks

Dr Barbara Lane FREng CEng

**To:** Barbara Lane  
**Cc:** Williams, Jago: CP-Plan: RBKC  
**Subject:** Contracted structural advice to RBKC

Barbara, RBKC would like to retain structural engineering support from Arup for the following.

1. On site analysis about safety of current recovery operation.
2. Assessment of structural stability of building on an ongoing basis.
3. Input/design of temporary support for investigation etc.
4. Initial assessment recommendation in relation to likelihood of demolition.

Could I meet someone at the scene today please. I will be requesting details of the existing structure/plans.

Please forward draft contract proposal (If needed at this stage) to my colleague Jago Williams above.

The payment for the services provided is guaranteed.

Thank you

Not at all

Hope you're ok

Barbara

**Subject:** Re: anyone know approx. peak temperatures (affect rebar recovery of full strength)

Barbara, thank you for the advice and support.  
I asked about temperatures. Not measured but estimate 600 to 1000 degrees
