Subject: CONFIDENTIAL - Grenfell Tower fire

Good morning All,

Further to the dramatic news that we have all awoken to this morning and the images of Grenfell Tower, I can advise you that John Allen is currently at the scene. Jay from Hammersmith has spoken to John (as did Anthony earlier offering LDSA help and support) asking if he required any help. John advised that at the moment he is on site, but there was nothing that he could do at present, however he did say that the building was built in 1974 and is a reinforced concrete building and if anyone has structural engineers that have direct experience of reinforced concrete behaviour in fire situations, it would be useful to know. There is speculation that collapse may be possible, although it

is thought that the building was built under the revised regulations at the time that dealt with progressive collapse, however partial collapse may be possible.

If you should have engineers (or surveyors for that matter) who have experience of rf concrete in fire and/or high rise fires etc, please can you email John Allen (copy both Anthony and myself, as John's emails/phone will be overloaded)?

Thank you

Bob
